PROJECTS

LLM Arena | Node.js, Express, REST APIs, JavaScript, Git, Render

- Built a full-stack web application that queries 3 LLMs in parallel via a third-party API and uses a 4th model to automatically judge and select the best response
- Implemented bias mitigation in the AI judging logic by randomizing response order before evaluation.
- Developed a responsive UI with real-time analytics, history tracking, and local data persistence.

AI Celebrity Persona Chatbot

React.js, JavaScript, AI/LLM API, Text-to-Speech API, Image Generation API

- Independently designed and built a chatbot that emulates a chosen celebrity's personality, tone, and speech style using an AI/LLM API.
- Developed the entire frontend in React.js and JavaScript, integrating text, voice, and image-based interactions in a single chat interface.
- Added voice responses using a text-to-speech API and image generation for visual replies, making conversations feel more realistic and immersive.
